Portfolio

Growing up in a rural setting, I developed a deep interest in hands-on making, materials, construction details, and the relationship between design and building. Over the years, I have worked on projects ranging from practical solutions for the home to full-scale structures, often reusing existing materials and responding to the local environment.

This approach, rooted in an understanding of place, materials, and community, also guides my architectural work as a student, with research and digital tools integrated into the design process.

My experience at an international robotics company has strengthened my ability to work in multidisciplinary teams, learn independently, and tackle complex challenges.

I am seeking to join an architectural practice, continue learning and developing, and contribute to meaningful projects that shape the built environment and society in Israel.

Professional Experience

2022 - 2023 | TEMI
Product Implementation Specialist

- Worked directly with investors, distributors, and international partners, coordinating across teams.
- Led training and technology implementation in Israel and abroad.
- Performed software and hardware QA, identifying issues and providing solutions.
- Contributed to research and development (R&D) and technology integrations.
- Represented TEMI at international conferences and industry events.

2018 - 2021 | Military Advocate General's Corps
Legal Assistant, Advisory and Legislation Department

- Supported the department head, a lieutenant colonel, in a fast-paced, multitasking environment.
- Drafted legislation, prepared meeting summaries, and followed up on decisions.
- Awarded a Certificate of Excellence by the Military Advocate General.

Education

2023 - Present | Bezalel

- Bachelor of Architecture (B.Arch)
- Fourth year; expected graduation: 2028

2020 - 2021 | The Open University

Completed the first year of a B.S. in Chemistry

Skills

Revit (basic) | AutoCAD | Rhino 8

Grasshopper | Enscape | QGIS

Photoshop | Illustrator

3D printing | CNC | Laser cutting | AI-assisted development

Languages

Hebrew | English

Interests

Carpentry and construction | Agriculture and gardening | Extreme sports
